EDUCATION

Honor Program - University of Science, VNU-HCM, Bachelor Degree's Faculty of Software Development | Ho Chi Minh city, Viet Nam

Current GPA: **3.51 / 4.0**

2021 - Present

EXPERIENCE

Panasonic, Ai Developer | Freelance

Feb 2025

- Languages/Technologies used: Typescripts, React, Redux toolkit, Figma, Python.
- Designed and developed an AI-generated filter feature for Panasonic's mini-game, enhancing user engagement through innovative UI/UX design.
- Built and optimized the frontend using React and TypeScript, integrating API calls and managing application logic for seamless performance.

Beyonds JSC, Front-end Developer | Full-time

Apr 2024 - Jan 2025

- Languages/Technologies used: Typescripts, React, Redux toolkit, Remix, Azure, Figma.
- Worked in an Agile development process to ensure efficient collaboration and delivery.
- Designed and improved UI/UX during the initial phase of the project.
- Assisted in implementing backend functionality and integrating frontend with the backend using Django and PostgreSQL.

iStorage Team, Front-end Developer | Part-time

Nov 2022 - Apr 2024

- Languages/Technologies used: Javascripts, React, Redux toolkit, Git, Figma.
- Designed and improved UI/UX to enhance user experience.
- Implemented designed UI, managed API calls, and handled application logic.
- The work is deployed to use in the department of home affairs in a province and help reducing over 90% of labor efforts by automating the legacy workflow.

HONORS AND AWARDS

Finalist of the AI Challenge Ho Chi Minh City 2024. Event retrieval from visual data.

2024

Honorable at The 2023 ICPC Vietnam National Programming Contest

2023

Honorable at The 2022 ICPC Vietnam National Programming Contest

2022

Second prize with top 20 best paperworks. Vietnam Science and Engineering Fair.

2021

PROJECTS

Bypass Captcha | Python

Feb 2024 - Apr 2024

- Developed an automated CAPTCHA bypass solution using machine learning, YOLOv8, and Selenium for browser automation.
- Trained models to detect objects in 3x3 and 4x4 CAPTCHA grids, improving detection accuracy for complex layouts.

NFT Market Place | Reactjs, Solidity Smart Contract, Expressjs, MongoDB

Feb 2023 - Jun 2023

- Collaborated in a team of three to develop an NFT marketplace as part of the Introduction to Software Development course.
- Designed and implemented Solidity smart contracts to handle NFT creation, ownership, and transactions on the blockchain.
- Built a responsive frontend using React.js, Next.js, Node.js, HTML, CSS, and JavaScript, delivering an intuitive user interface for buying, selling, and browsing NFTs.
- Developed the backend with Express.js and MongoDB, enabling secure data storage, user authentication, and seamless integration with the frontend and smart contracts.

SKILLS

Languages C/C++, Python, Javascript/Typescript

Framework React.js, Django, Remix

Language Vstep B2, Vietnamese (native speaker)
